

ProSys is now providing SMS/Akron Phaser Megasonic Array transducers for use on Rear-mount or Gama systems, Series 1, 2 and 3. Patented bonding and assembly processes enable ProSys to provide a superior product at a lower cost.

Features & Benefits

- Plug-compatible with OEM transducers
- Built with ProSys patented technology
- Repairable
- Stainless steel resonator
- No failures in the field in 8 years
- Reliability: MTTF >50,000 hours
- Easy to install
- Works with the OEM SPA-400A/B

Technical Specifications

- Operating frequency: 1MHz +/- 10kHz
- Operating impedance: 50 ohm +/- 5 ohm
- Will work with Phaser RF controls
